<b>Investment Strategy of the Scheme</b>	The Scheme will be managed passively with investments in stocks in a proportion to the weights of these stocks in the Nifty Bank Index. The investment strategy would revolve around reducing the tracking error to the least possible through rebalancing of the portfolio, considering the change in weights of stocks in the index as well as the incremental collections/redemptions from the Scheme. The Scheme may invest in debt & money market instruments permitted by SEBI / RBI to meet the liquidity and expenses of the scheme.															
<b>Risk Profile of the Scheme</b>	<p><b>1. Risks associated with investing in equities:</b></p> <p>While securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the stock exchanges. The liquidity of the Schemes' investments is inherently restricted by trading volumes in the securities in which it invests.</p> <p>The value of the Scheme's investments, may be affected generally by factors affecting securities markets, such as price and volume volatility in the capital markets, interest rates, currency exchange rates, changes in policies of the Governments, taxation laws or any other appropriate authority policies and other political and economic developments which may have an adverse bearing on individual securities, a specific sector or all sectors including equity and debt markets. Consequently, the NAV of the Units of the Scheme may fluctuate and can go up or down.</p> <p>Trading volumes, settlement periods and transfer procedures may restrict the liquidity of these investments. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The inability of the Scheme's to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities.</p> <p>The scheme will also be vulnerable to movements in the prices of securities invested by the scheme which again could have a material bearing on the overall returns from the scheme.</p> <p><b>Market Risk</b> The Scheme's NAV will react to the stock market movements. The Investor could lose money over short periods due to fluctuation in the Scheme's NAV in response to factors such as economic and political developments, changes in interest rates and perceived trends in stock prices and market movements, and over longer periods during market downturns.</p> <p><b>Market Trading Risks</b></p> <ul style="list-style-type: none"> <li>• <b>Absence of Prior Active Market:</b> Although units of the Scheme are listed on the Exchange, there can be no assurance that an active secondary market will develop or be maintained.</li> <li>• <b>Lack of Market Liquidity:</b> Trading in units of the Scheme on the Exchange may be halted because of market conditions or for reasons that in the view of the Market Authorities or SEBI, trading in units of the Scheme is not advisable. In addition, trading in units of the Scheme is subject to trading halts caused by extraordinary market volatility and pursuant to NSE/BSE and SEBI "circuit filter" rules. There can be no assurance that the requirements of the Market necessary to maintain the listing of units of the Scheme will continue to be met or will remain unchanged.</li> <li>• <b>Units of the Scheme may trade at Prices other than NAV:</b> Units of the Scheme may trade above or below its NAV. The NAV of the Scheme will fluctuate with changes in the market value of Scheme's holdings. The trading prices of units of the Scheme will fluctuate in accordance with changes in their NAVs as well as market supply and demand of units of the Scheme. However, given that units can be created and redeemed directly with the Fund if the subscription / redemption amount is greater than Rs. 25 cr., it is expected that large discounts or premiums to the NAVs of the Scheme will not sustain due to arbitrage possibility available.</li> <li>• <b>Regulatory Risk:</b> Any changes in trading regulations by the Stock Exchange/s or SEBI may affect the ability of market maker to arbitrage resulting into wider premium / discount to NAV. Although, the units are listed on NSE/BSE, the AMC and the Trustees will not be liable for delay in listing of Units of the Scheme on the stock exchanges / or due to connectivity problems with the depositories due to the occurrence of any event beyond their control.</li> <li>• <b>Settlement Risk:</b> In certain cases, settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities as in certain cases, settlement periods may be extended significantly by unforeseen circumstances. Similarly, the inability to sell securities held in the Scheme portfolio may result, at times, in potential losses to the Scheme, and there can be a subsequent decline in the value of the securities held in the respective Scheme's portfolio.</li> <li>• <b>Right to Limit Redemptions:</b> The Trustee, in the general interest of the Unit holders of the Scheme offered in this Document and keeping in view the unforeseen circumstances / unusual market conditions, may limit the total number of Units which can be redeemed on any Business Day. The same shall be in accordance with SEBI Master Circular for Mutual Funds dated May 19, 2023 with respect to Restriction on redemption in Mutual Funds.</li> </ul>															

<p><b>Risk Profile of the Scheme</b></p>	<ul style="list-style-type: none"> <li>• <b>Portfolio Concentration Risk:</b> To the extent that the Scheme may concentrate its investments in the securities of certain companies/ sectors, the Scheme will therefore be subject to the risks associated with such concentration. In addition, the Scheme may be exposed to higher levels of volatility and risk than would generally be the case in a more diverse fund portfolio of equity securities. Such risks may impact the Scheme to the extent that it invests in particular companies/sectors even in cases where the investment objective is more generic.</li> <li>• <b>Volatility Risk:</b> The equity markets and derivative markets are volatile and the value of securities, derivative contracts and other instruments correlated with the equity markets may fluctuate dramatically from day to day. This volatility may cause the value of investment in the Scheme to decrease.</li> <li>• <b>Redemption Risk:</b> All direct transactions in units of the Scheme by MMs/Aps or other eligible investors with the AMC/the Fund shall be at intra-day NAV based on the actual execution price of the underlying portfolio. Any order placed for redemption or subscription directly with the AMC must be of greater than Rs. 25 Cr. The aforesaid threshold shall not be applicable for Aps/MMs and shall be periodically reviewed. Investors can transact in the units of the Scheme directly with the AMC if the subscription amount is more than Rs. 25 Cr. In the respective creation unit size.</li> <li>• <b>Passive Investments:</b> The Scheme is not actively managed. The Scheme may be affected by a general decline in the Indian markets relating to its Underlying Index. The Scheme invests in the securities included in its Underlying Index regardless of their investment merit. The AMC does not attempt to individually select stocks or to take defensive positions in declining markets.</li> <li>• <b>Tracking Error and Tracking Difference Risk:</b> The AMC would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. Under normal circumstances, the AMC will endeavour that the tracking error of the Scheme does not exceed 2% per annum. However, this may vary due to various reasons mentioned below or any other reasons that may arise and particularly when the markets are very volatile.</li> </ul> <p>Factors such as the fees and expenses of the Scheme, Corporate Actions, Cash balance, changes to the Underlying Index and regulatory policies may affect AMC's ability to achieve close correlation with the Underlying Index of respective Scheme. The Scheme' returns may therefore deviate from those of their Underlying Index. "Tracking Error" is defined as the standard deviation of the difference between daily returns of the index and the NAV of the respective Scheme. Tracking Difference" is the annualized difference of daily returns between the Index and the NAV of the scheme (difference between fund return and the index return). Tracking Error and Tracking difference may arise including but not limited to the following reasons:</p> <ul style="list-style-type: none"> <li>• Expenditure incurred by the Scheme.</li> <li>• The funds may not be invested at all times as it may keep a portion of the funds in cash to meet redemptions or for corporate actions of securities in the index.</li> <li>• Any delay experienced in the purchase or sale of shares due to illiquidity of the market, settlement and realization of sale proceeds and the registration of any securities transferred and any delays in receiving cash and scrip dividends and resulting delays in reinvesting them</li> <li>• The underlying index reflects the prices of securities at close of business hours. However, the Fund may buy or sell the securities at different points of time during the trading session at the then prevailing prices which may not correspond to the closing prices on the exchange.</li> <li>• The potential for trades to fail which may result in the Scheme not having acquired shares at a price necessary to track the index.</li> <li>• The holding of a cash position and accrued income prior to distribution and accrued expenses.</li> <li>• Disinvestments to meet redemptions, recurring expenses, dividend payouts etc.</li> <li>• Securities trading may halt temporarily due to circuit filters.</li> <li>• Corporate actions such as rights, merger, change in constituents etc.</li> <li>• Rounding off quantity of shares underlying the index.</li> <li>• Index providers undertake a periodical review of the scrips that comprise the Underlying Index and may either remove or include new scrips. In such an event, the Scheme will endeavour to reallocate its portfolio but the available investment opportunity may not permit absolute mirroring immediately.</li> </ul> <p><b>2. Risks associated with investing in fixed income:</b></p> <ul style="list-style-type: none"> <li>• <b>Interest Rate risk:</b> This risk is associated with movements in interest rate, which depend on various factors such as government borrowing, inflation, economic performance etc. The values of investments will appreciate/depreciate if the interest rates fall/rise.</li> <li>• <b>Credit risk:</b> This risk arises due to any uncertainty in counterparty's ability or willingness to meet its contractual obligations. This risk pertains to the risk of default of payment of principal and interest.</li> <li>• <b>Liquidity risk:</b> The liquidity of a security may change depending on market conditions leading to changes in the liquidity premium linked to the price of the security. At the time of selling the security, the security can become illiquid leading to loss in the value of the portfolio.</li> </ul>
<p><b>Plans and Options</b></p>	<p>Currently, there are no plans/ options under the Scheme. However, the Trustees reserve the right to introduce/ alter/ extinguish any of the option under the Scheme at a later date. For any change in plans/ options offered under the Scheme, the AMC shall publish a notice-cum-addendum for the information of the investors. Currently, there are no plans/ options under the Scheme.
