B-I – A Scheme with Relatively Low Interest Rate Risk and Moderate Credit Risk

SHORT-TERM INVESTOR'S ISSUES WITH TRADITIONAL PRODUCTS

HOW LIQUID FUNDS CAN BE AN EFFECTIVE SOLUTION

Relatively Better Returns vis-à-vis Traditional Product

Liquid mutual funds tend to offer better investment experience than traditional products.

Relative Stability Of Investment

Liquid mutual funds invest in predominantly highly rated money market instruments with up to 91 days residual maturities.

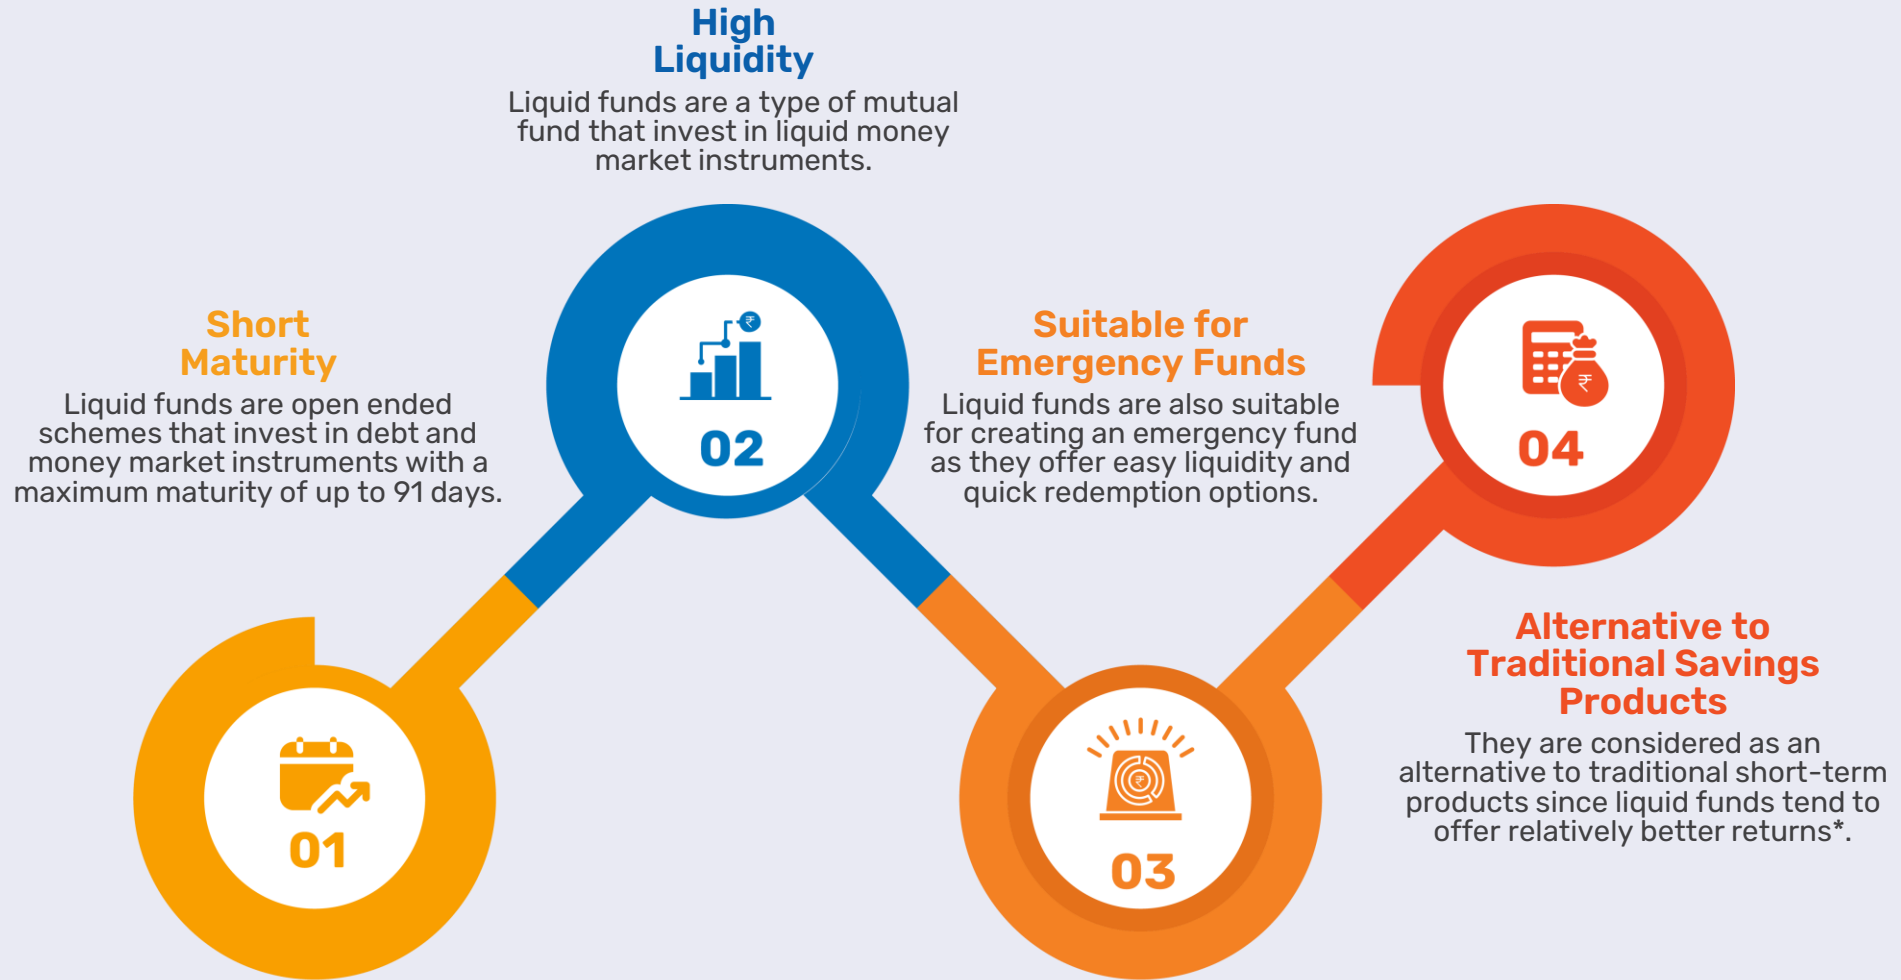

Cash Management

Insta Redemption facility up to Rs. 50,000[@]. Investors can also redeem their units at any time with T+1 settlement timeline and plan their liabilities.

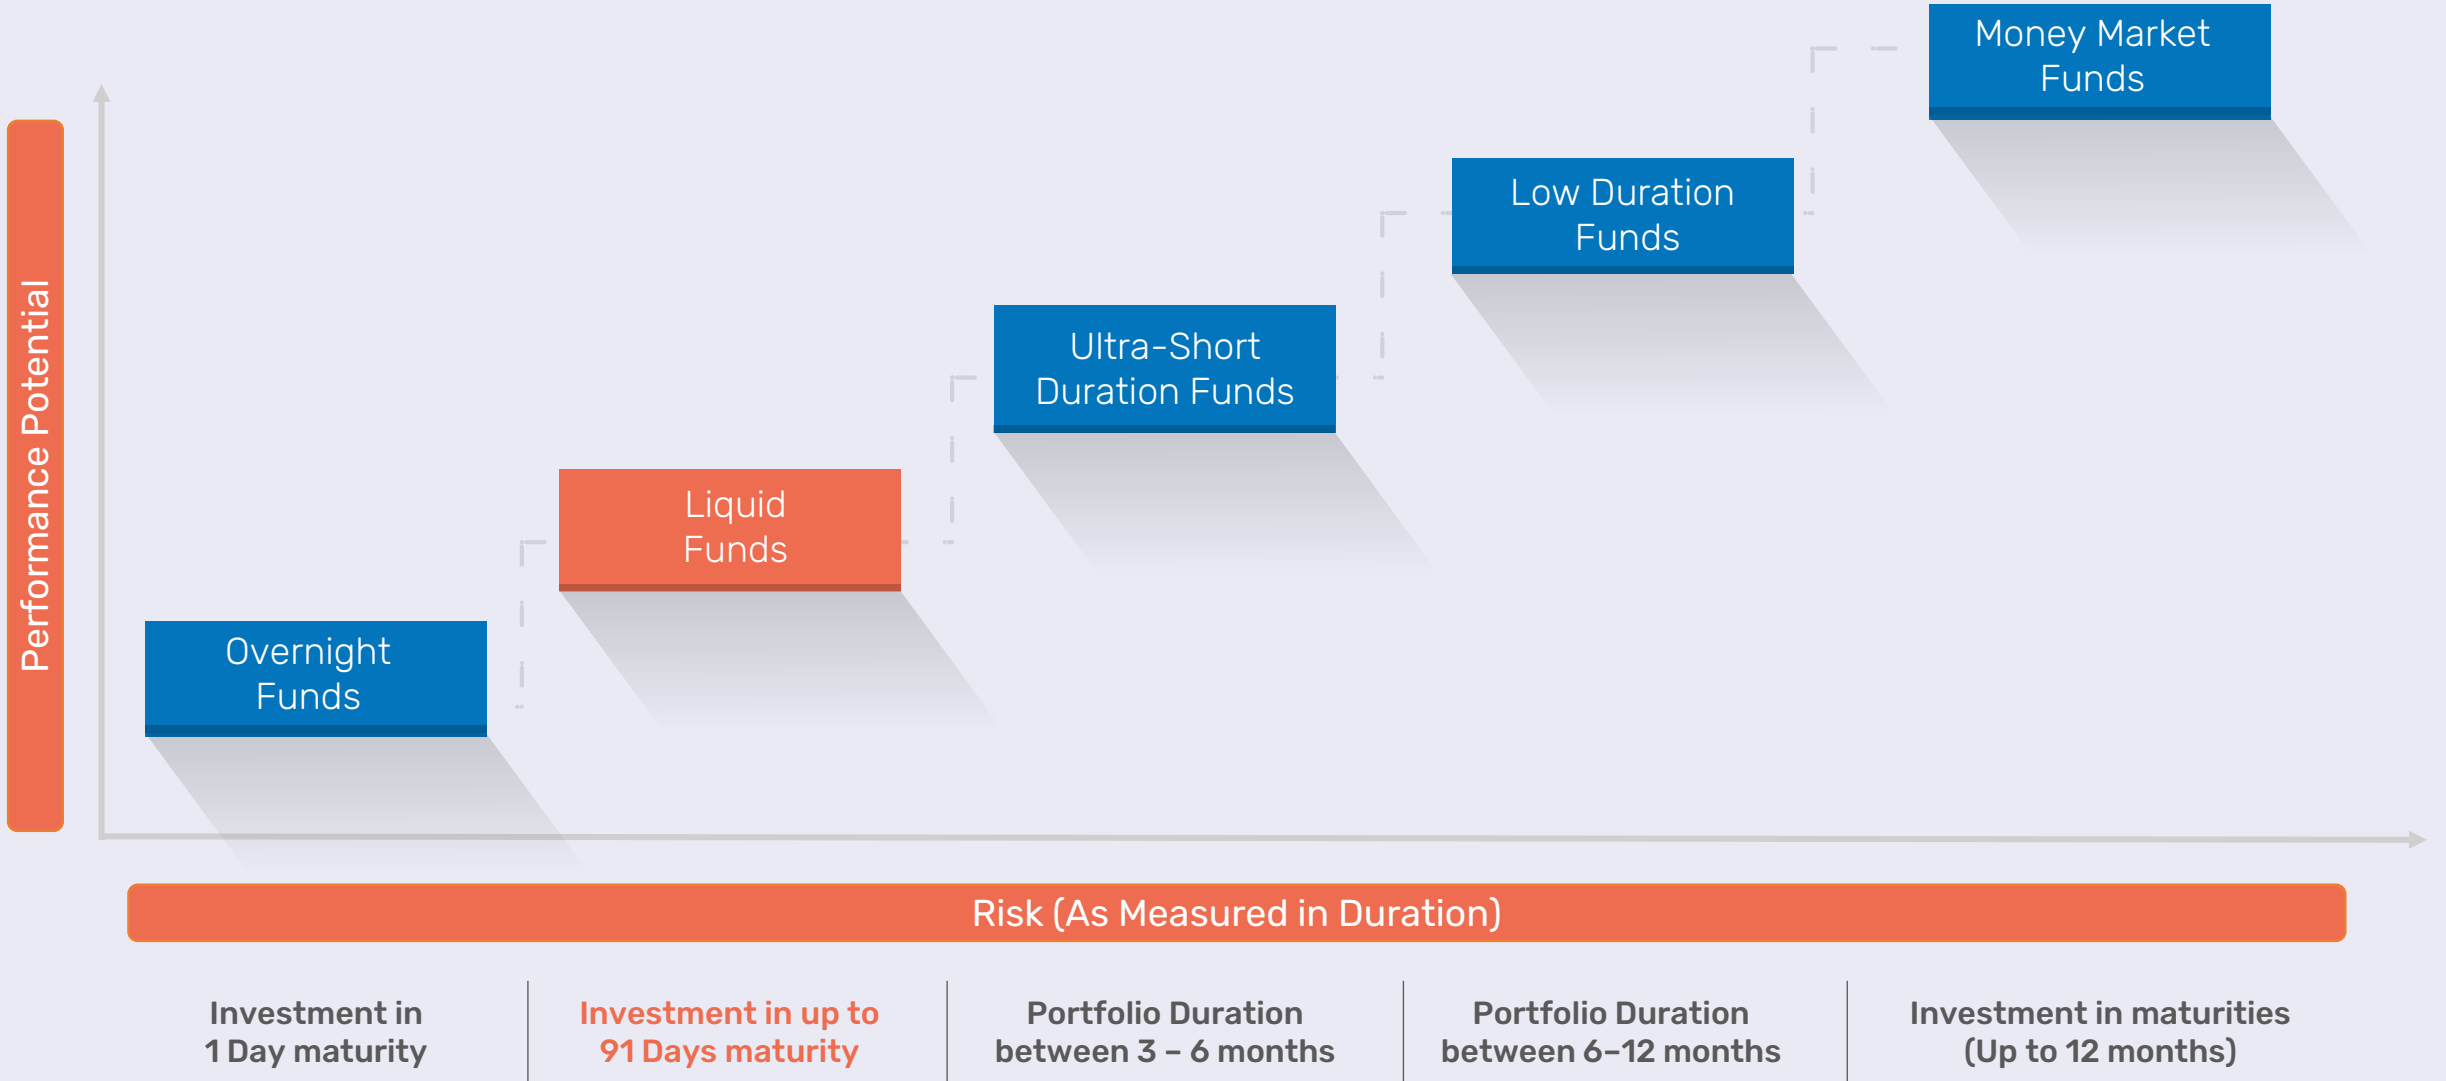

[@]: per day per scheme.

WHAT ARE LIQUID FUNDS

*Returns from liquid funds vary depending on underlying money market conditions. The returns on the traditional banking products usually are stable over the long period of time.

RISK MANAGEMENT FRAMEWORK (RMF) OF BAJAJ FINSERV MUTUAL FUND

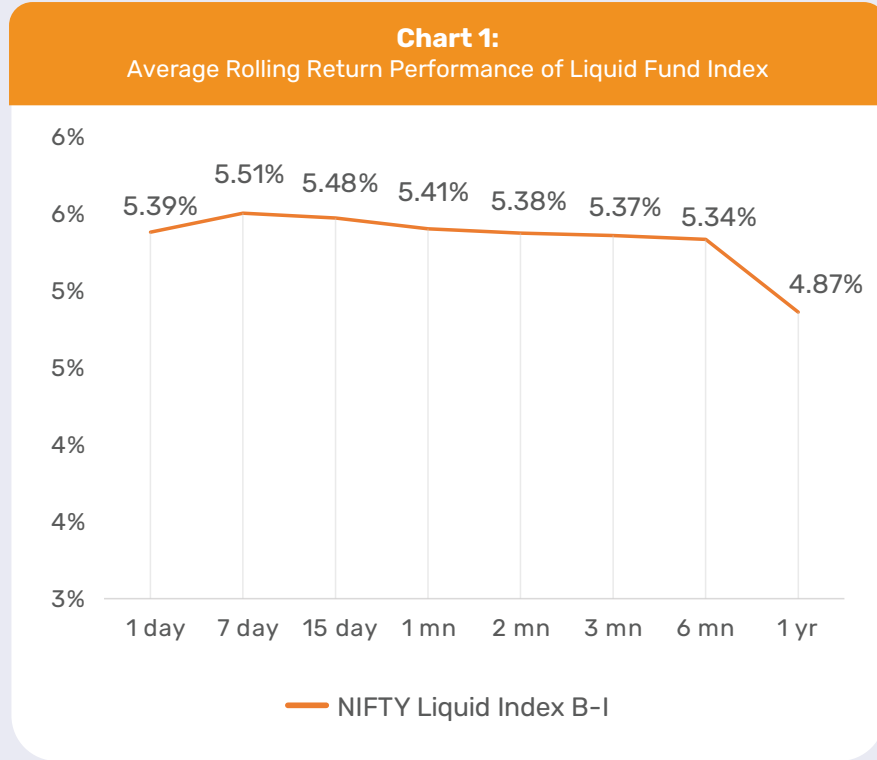

IS YOUR SAVINGS ACCOUNT COSTING YOU?

Source: *Leading PSU Bank savings account interest rates. Liquid fund performance is One Month annualised rolling performance of NIFTY Liquid Index B-I. The amount calculation assumes that there is Rs 1 lakh invested in the respective asset classes and that the said investment is allowed to accrue over the given period of time. Past performance may or may not be sustained in future.

PERFORMANCE & RISK PROFILE OF LIQUID FUNDS IN MONEY MARKET SPACE

Liquid Funds Index average fund performance of approximately 5.39% even on 1 day investment horizon.

Liquid Funds Index provided minimum return of 2.37% (per annum for 1 month investment horizon).

Liquid Fund Index performance shows relative consistency in the time frame for horizons between 7 day to 3 months.

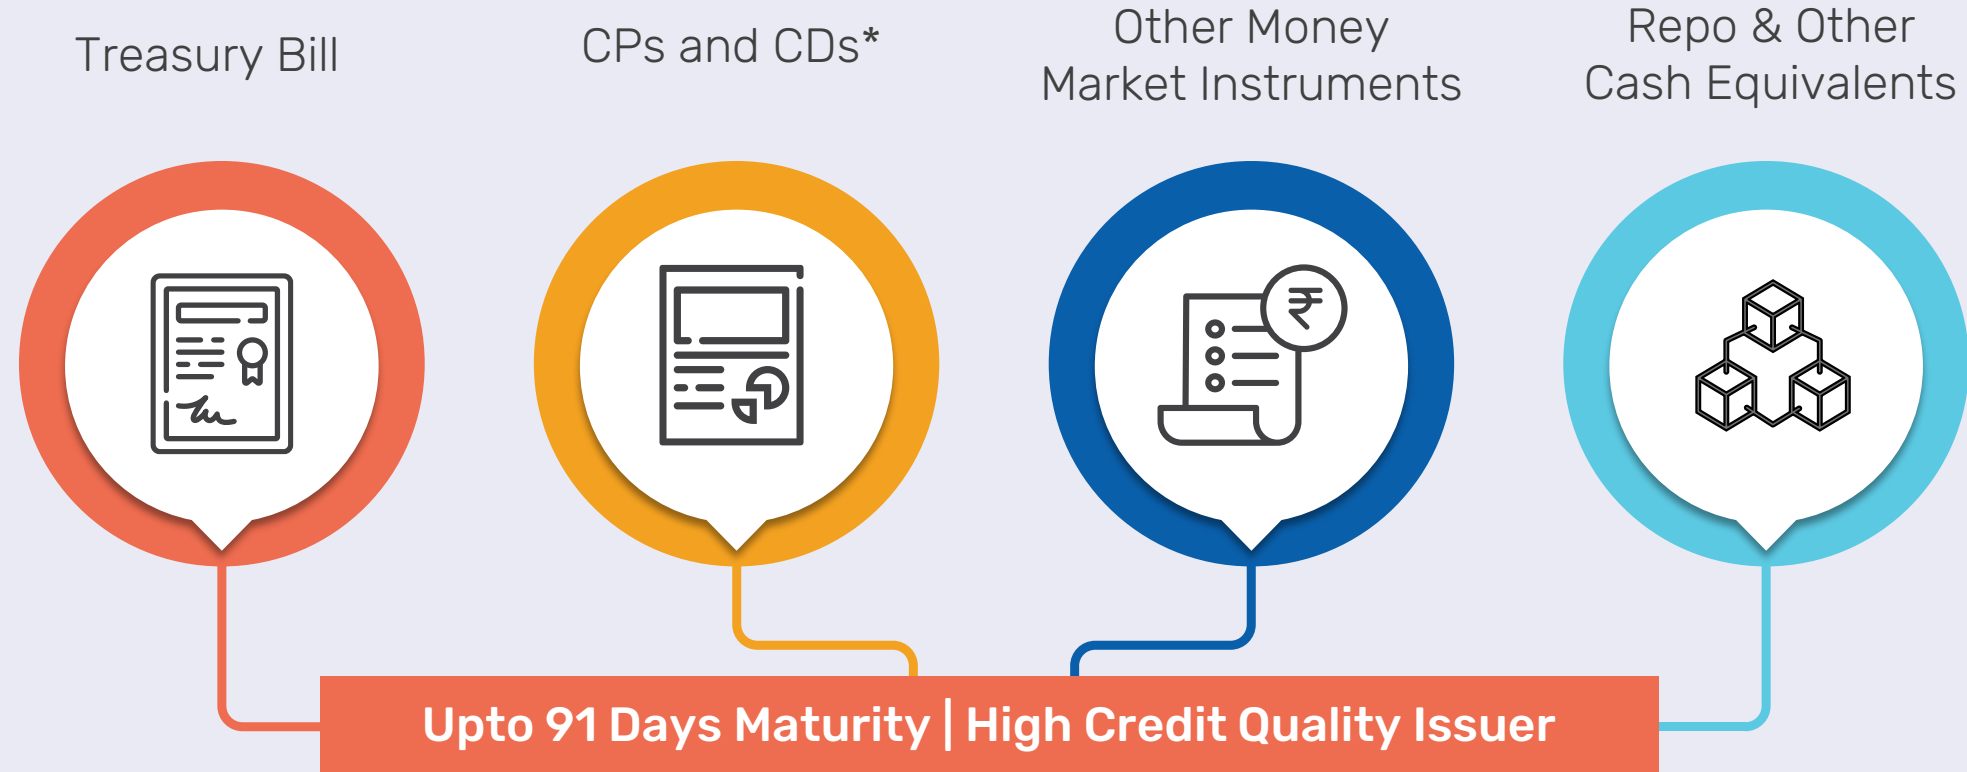

Data Source: AMFI. Data is rolling return for respective periods from Jan 2018 till May 2023. The positive performances are simple annualised and negative performances are compounded annualised. Past performance may not sustain in future. Mutual Fund investments are subject to market risks, read all scheme related documents carefully. Past performance may or may not be sustained in future.

* Banks, Insurance Companies, Financial Institutions, Multinational Corporations, Large, Mid and Small, Corporates including SMEs .

^ Provident Funds, Charitable Trusts, etc.

WHERE WILL THE SCHEME INVEST?

* Commercial Paper and Certificate of Deposit. The above is only suggestive of where the major allocation of fund may be invested. For detailed list of instruments where the fund can invest, please refer to the SID section - "Where will the Scheme invest?"

DEBT MARKET OUTLOOK

Data Source: RBI, as on 31st May 2023.

In May, the Indian debt market experienced positive developments, with yields softening across the curve. The better-than-expected Consumer Price Index (CPI) numbers and large purchases of Indian bonds by foreign funds supported the market. However, experts suggest that **unless** there is a significant weakening of economic data in India, **further bond rallies are unlikely in the near future.**

Furthermore, the banking system in India is expected to receive a short-term liquidity boost from the withdrawal of Rs. 2,000 denomination notes. This, along with the anticipation of the Reserve Bank of India's decision to maintain the policy repo rate due to easing inflation, **suggests that rates are likely to remain steady.** The surplus liquidity in the banking system has led to a decline in overnight rates, indicating improved liquidity conditions.

Looking ahead, **we anticipate that debt markets will remain stable, with a narrow range of movement** until there is more clarity on both local and global economic growth. The **shorter end of the yield curve is expected to remain well bid** due to improving liquidity conditions.

For investors with a shorter investment horizon of 1 to 12 months, **Liquid funds are suggested due to relatively attractive yields in the one month plus segment of the curve.**
