Combining fundamental and behavioural finance principles provides a key advantage in managing investments. Our proprietary asset allocation model at Bajaj Finserv AMC is based on those two elements namely: fundamental analysis and behavioural insights. It ensures that our Balanced Advantage Fund is well-positioned to navigate market complexities and deliver long-term value to our investors. By understanding the interplay of various market factors, we can make informed decisions that align with our investors' goals, fostering financial growth and stability. This unique approach helps us determine the optimal asset allocation between equity and debt, providing an edge for our investors.

Fundamental Indicator:

Our fundamental indicator focuses on the Nifty 50 Index, analysing its ideal earnings and valuations. Ideal earnings are forward-looking estimations, while ideal valuations are comparative, offering a realistic assessment rather than absolute measures. This robust analysis forms the backbone of our model, ensuring a sound foundation for asset allocation.

Behavioural Indicator:

The differentiation in our model lies in the behavioural indicator, which measures behavioural and sentimental trends in the market by monitoring four key factors: **currencies, commodities, bonds, and equities**. Let's explore how each of these factors contributes to our asset allocation strategy:

• Reflect risk appetite.

• Risky currencies signal optimism; safe havens show caution.

• Helps predict capital flows into Indian equities.

• Rising prices = strong economy; precious metals up = uncertainty.

• Guides sector allocation (energy, industrials) based on economic cycles.

• Yield spreads & curves show investor sentiment and liquidity.

• Narrowing spreads = confidence, steep curve = growth expectations.

• Guides equity investment in growth sectors.

• Large-cap focus = stability; small/mid-caps = higher risk.

• Sector rotations signal where investors see growth or safety.

• Informs strategic asset allocation.

The sequence, relationship and nature of trends in these assets helps understand and anticipate market movements driven by psychological factors, leading to more informed and effective investment decisions. By integrating behavioural insights with fundamental analysis, our model offers a comprehensive approach to asset allocation, optimizing returns while managing risks.
