4.	Foreign securitized debt

The cumulative gross exposure through equity, debt, money market instruments, units of mutual fund schemes, securitised debt, Gold ETFs, Silver ETFs, Exchange Traded Commodity Derivatives (ETCDs), units issued by REITs and InvITs, equity derivatives, fixed income derivatives, Foreign securities/ Overseas ETFs, repo transactions in corporate debt securities, special features instrument and such other securities/assets as may be permitted by the Board from time to time should not exceed 100% of the net assets of the scheme in accordance with SEBI Master Circular for Mutual Funds dated June 27, 2024.

All of the Scheme's assets will be invested in transferable securities. The corpus of the Scheme shall not in any manner be used in option trading, short selling or carry forward transactions as stipulated in SEBI Regulations and amended from time to time.

Pending deployment of the funds in securities in terms of investment objective of the Scheme, the AMC may park the funds of the Scheme in short term deposits of the Scheduled Commercial Banks, subject to the guidelines mentioned in SEBI Master Circular for Mutual Funds dated June 27, 2024, as may be amended from time to time.

In accordance with SEBI Master Circular for Mutual Funds dated June 27, 2024, in the event of asset allocation falling outside the limits specified in the asset allocation table mentioned above, due to passive breaches, the fund manager will review and rebalance the same within 30 business days from the date of such deviation. In case the portfolio is not rebalanced within the period of 30 business days, justification in writing for the same including efforts taken to rebalance the portfolio shall be placed before the Investment Committee. The Investment Committee, if so desires, can extend the timelines upto 60 business days from the date of completion of mandated rebalancing period.

In case the scheme is not rebalanced within the aforementioned mandate plus extended timelines:

- a. The AMC shall not be permitted to launch any new scheme till the time the portfolio is rebalanced.
- b. The AMC shall not levy any exit load, (if any), on the investor exiting the Scheme.

In case the AUM of the deviated portfolio is more than 10% of the AUM of the main portfolio of the scheme.

- i. The AMC shall immediately communicate the same to the investors of the scheme after the expiry of the mandated rebalancing period (i.e. 30 Business Days) through SMS and email/ letter including details of portfolio not rebalanced.
- ii. The AMC shall also immediately communicate to the investors through SMS and email/letter when the portfolio is rebalanced.
- iii. The AMC shall disclose scheme wise deviation of the portfolio (beyond aforesaid 10% limit) from the mandated asset allocation beyond 30 business days, on the AMC 's website i.e. www.bajajamc.com.

The AMC shall also disclose any deviation from the mandated asset allocation to investors along with periodic portfolio disclosures as specified by SEBI from the date of lapse of mandated plus extended rebalancing timelines.

As per SEBI Circular No. SEBI/HO/IMD/PoD2/P/CIR/2025/92 dated June 26, 2025, the above timeline for rebalancing of portfolios will also be applicable on passive breaches of various prudential limits specified under SEBI (Mutual Funds) Regulations, 1996 and various circulars issued from time to time.

	Short term defensive consideration: When the Fund Manager/s believes market or economic conditions are unfavourable for investors, minimum and maximum asset allocation can be altered for a short-term period on defensive considerations as per SEBI Master Circular for Mutual Funds dated June 27, 2024. Such changes in the investment pattern would be rebalanced to the above asset allocations within 30 calendar days from the date of deviation.
Investment Strategy	The investment strategy aims to generate income and capital appreciation by investing across equity and equity related instruments including equity derivatives, debt & debt derivatives and money market instruments, Gold ETFs, Silver ETFs, ETCs and in units of REITs & InvITs. The portfolio will manage the fund within the ambit of its in-house fund philosophy – INQUBE. The Scheme may invest in various derivative instruments which are permissible under the applicable regulations. Derivatives will be used for the purpose of hedging, and portfolio balancing, or such other purpose as may be permitted under the regulations and Guidelines from time to time. Such investments shall be subject to the investment objective and strategy of the Scheme and the internal limits if any, as laid down from time to time. These include but are not limited to futures (both stock and index) and options (stock and index). Derivatives are financial contracts of pre-determined fixed duration, whose values are derived from the value of an underlying primary financial instrument such as interest rates, exchange rates, commodities and equities. Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments. In pursuance of Investment Objective of the Scheme, the Scheme may use derivatives to generate income through arbitrage opportunities such as Index/Stock Spot vs Index/Stock Futures or Index Futures vs Stock Futures or Future of same stock with different expiry months or underlying shares etc. The Scheme may also use corporate action or event driven strategy where there is a potential opportunity for arbitrage in cash or derivative market such as dividend arbitrage or buy-back arbitrage or merger etc. The scheme's equity portfolio will seek to invest in dividend-yielding opportunities to provide investors with relatively low-risk, cash-generating prospects for the portfolio and to allow for the growth opportunities in the play out over the period. The security selection will emphasize on criteria such as dividend track record, payout ratios, growth in cash flow generation, and other growth metrics such as ROCE, ROE etc. However, the fund manager

retains the discretion to pursue investment opportunities regardless of the style, with the aim of optimizing the risk-reward trade-off for the portfolio from time to time.

The scheme's allocation to equity, debt, and commodities will be dynamic, guided by internal models considering factors such as valuation levels, macroeconomic conditions, and capitalization rates. The scheme may invest in Exchange Traded Commodity Derivatives (ETCD) or ETFs with commodity underlying assets, as well as other permissible instruments linked to commodity prices.

The scheme may also invest in overseas financial assets for diversification purposes, subject to SEBI/RBI regulations.

The research framework incorporates data, behavioral and market sentiment fundamental insights to guide cross-asset and cross-market allocation decisions. Stock selection is driven by a macro narrative considering factors such as valuation, liquidity, risk appetite, and the impact of time on these dimensions.

The scheme's investment strategy may be reviewed and modified as deemed necessary in the best interest of unit holders and market conditions.

The portfolio construction emphasizes broad diversification, ongoing review of market parameters, and focus on investment-grade debt securities. The scheme maintains a focus on credit quality, liquidity, and interest rate outlook for debt investments. Risk control measures and rigorous credit evaluation are incorporated to mitigate risks.

The fund shall pursue its investment strategy within the contours of the inhouse proprietary fund management philosophy called 'INQUBE'.

INQUBE Investment Philosophy:

The **INQUBE** fund management philosophy is based on first principles understanding of the market dynamics. The process at its core emanates from the studied realisation that fund alpha is an outcome of three edges namely the **I**nformation edge, the **Q**uantitative edge and the **B**ehavioural edge of the investment team. At its core, the INQUBE investment philosophy borrows from human nature and behavioral finance as a knowledge discipline.

To realise the edge at the stock ideas hunting stage, the process shall involve a simultaneous application of top-down and bottom-up research to identify potential investments. It also involves evaluating business cycles and trends, such as momentum and trend reversal patterns, in order to identify potential investment opportunities and the stage of growth such potential ideas may be at.

	At the ideas analysis stage, the process involves analysing the business, management and valuation to guide the stock selection process. While undertaking the allocation decisions, the business shall be filtered on account of its size, quality, valuation, growth outlook, and risk; to measure and structure the allocation. The AMC/Sponsors/Trustee do not guarantee that the investment objective of the Scheme will be achieved. No guaranteed returns are being offered under the Scheme. <u>Portfolio Turnover</u> Portfolio Turnover is defined as the lower of purchases and sales after reducing all subscriptions and redemptions and derivative transactions there from and calculated as a percentage of the average assets under management of the scheme during a specified period of time. The AMC's portfolio management style is conducive to a low portfolio turnover rate. However, the AMC will aim to take advantage of the opportunities that present themselves from time to time because of the inefficiencies in the securities markets. The AMC will endeavour to balance the increased cost on account of higher portfolio turnover with the benefits derived there from.
Risk Profile of the Scheme	Bajaj Finserv Multi Asset Allocation Fund would be investing in Equity & Equity related Securities, Debt & Money Market Instruments, Gold ETFs, Silver ETFs and Exchange Traded Commodity Derivatives (ETCDs), in units of REITs & InvITs and such other asset classes permitted by SEBI from time to time. Different asset class carry different types of risk as mentioned in the Scheme Information Document. Accordingly, the scheme's risk may increase or decrease depending upon the investment pattern. <u>1. Risks associated with investing in equities:</u> - Investors may note that AMC/Fund Manager's investment decisions may not be always profitable, as actual market movements may be at variance with anticipated trends. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of these investments. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme portfolio would result at times, in potential losses to the Scheme, should there be a subsequent decline in the value of securities held in the Scheme portfolio. - The value of the Scheme's investments may be affected generally by factors affecting securities markets, such as price and volume volatility in the capital markets, interest rates, currency exchange rates, changes in policies of the Government, taxation laws or any other appropriate authority policies and other political and economic developments which

may have an adverse bearing on individual securities, a specific sector or all sectors including equity and debt markets. Consequently, the NAV of the Units of the Scheme may fluctuate and can go up or down.

- The Mutual Fund may not be able to sell securities, which can lead to temporary illiquidity. There are risks inherent in securities lending, including the risk of failure of the other party, in this case the approved intermediary to comply with the terms of the agreement. Such failure can result in a possible loss of rights to be collateral, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of corporate benefits accruing thereon.
- Investors may note that dividend is due only when declared and there is no assurance that a company (even though it may have a track record of payment of dividend in the past) may continue paying dividend in future. As such, the scheme is vulnerable to instances where investments in securities may not earn dividend or where lesser dividend is declared by a company in subsequent years in which investments are made by scheme. As the profitability of companies are likely to vary and have a material bearing on their ability to declare and pay dividend, the performance of the scheme may be adversely affected due to such factors.
- While securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the stock exchanges. The liquidity of the Scheme's investments is inherently restricted by trading volumes in the securities in which it invests.
- Fund manager endeavors to generate returns based on certain past statistical trend. The performance of the scheme may get affected if there is a change in the said trend. There can be no assurance that such historical trends would continue.
- In case of abnormal circumstances, it will be difficult to complete the square off transaction due to liquidity being poor in stock futures/spot market. However, the scheme will aim to take exposure only into liquid stocks where there will be minimal risk to square off the transaction.
- Changes in Government policy in general and changes in tax benefits applicable to mutual funds may impact the returns to investors in the Scheme or business prospects of the Company in any particular sector.
- Investments in equity and equity related securities involve a certain degree of risk and Investors should not invest in the equity scheme unless they can afford to take the risk of losing their investment.

2. Risks associated with investing in fixed income:

- **Market Risk:** The NAV of the scheme, to the extent invested in Debt and Money Market securities, will be affected by changes in the general level of interest rates. The NAV of the scheme is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates.

- | | |
|--|--|
| | <ul style="list-style-type: none"> • Liquidity Risk: Money market securities, while fairly liquid, lack a well-developed secondary market, which may restrict the selling ability of the scheme and may lead to the scheme incurring losses till the security is finally sold. The liquidity of a bond may change, depending on market conditions leading to changes in the liquidity premium attached to the price of the bond. At the time of selling the security, the security can become illiquid, leading to loss in value of the portfolio. • Price Risk: Government securities where a fixed return is offered run price-risk like any other fixed income security. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates. The new level of interest rate is determined by the rates at which government raises new money and/or the price levels at which the market is already dealing in existing securities. This risk is not unique to Government Securities. It exists for all fixed income securities. However, Government Securities are unique in the sense that their credit risk generally remains zero. Therefore, their prices are influenced only by movement in interest rates in the financial system. • Settlement risk: The inability of the scheme to make intended securities purchases due to settlement problems could cause the scheme to miss certain investment opportunities. By the same rationale, the inability to sell securities held in the scheme's portfolio due to the extraneous factors that may impact liquidity would result, at times, in potential losses in case of a subsequent decline in the value of securities held in the scheme's portfolio. • Regulatory Risk: Changes in government policy in general and changes in tax benefits applicable to Mutual Funds may impact the returns to investors in the scheme. • Reinvestment Risk: This risk refers to the interest rate levels at which cash flows received from the securities in the scheme are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed. • Credit Risk: Investments in Debt Securities are subject to the risk of an issuer's inability to meet interest and principal payments on its obligations and market perception of the creditworthiness of the issuer. • Risks associated with investment in unlisted securities: Subject to applicable Regulations, the scheme can invest in unlisted securities. These securities are subject to greater price fluctuations, less liquidity and greater risk than the listed securities. Except for any security of an associate or group company, the scheme has the power to invest in securities which are not listed on a stock exchange ("unlisted Securities") which in general are subject to greater price fluctuations, less liquidity and greater risk than those which are traded in the open market. Unlisted securities may lack a liquid secondary market and there can be no assurance that the Scheme will realise their investments in |
|--|--|

	unlisted securities at a fair value. • Different types of fixed income securities in which the scheme would invest as given in the Scheme Information Document carry different levels and types of risk. Accordingly, the scheme risk may increase or decrease depending upon its investment pattern. e.g. corporate bonds carry a higher level of risk than Government securities. Further even among corporate bonds, bonds, which are AAA rated, are comparatively less risky than bonds, which are AA rated. AA rated corporate bonds are comparatively less risky when compared with A rated corporate bonds. • The AMC may, considering the overall level of risk of the portfolio, invest in lower rated securities offering higher yields as well as zero coupon securities that offer attractive yields. This may increase the absolute level of risk of the portfolio. • As zero coupon securities does not provide periodic interest payments to the holder of the security, these securities are more sensitive to changes in interest rates. Therefore, the interest rate risk of zero coupon securities is higher. The AMC may choose to invest in zero coupon securities that offer attractive yields. This may increase the risk of the portfolio. • The scheme at times may receive large number of redemption requests leading to an asset-liability mismatch and therefore requiring the AMC to make a distress sale of the securities leading to realignment of the portfolio and consequently resulting in investment in lower yield instruments. • Basis Risk: Basis risk arises due to a difference in the price movement of the derivative vis-à-vis that of the security being hedged. • Spread Risk: In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. In the life of the security, this spread may move adversely leading to loss in value of the portfolio. The yield of the underlying benchmark might not change, but the spread of the security over the underlying benchmark might increase leading to loss in value of the security. • Counterparty Risk: This is the risk of failure of counterparty to a transaction to deliver securities against consideration received or to pay consideration against securities delivered, in full or in part or as per the agreed specification. There could be losses to the Scheme in case of a counterparty default. • Duration Risk: Duration risk refers to the movement in price of the underlying invested money market / debt instruments due to movement/change in interest rates over different durations of maturity of instruments. In a portfolio of debt assets, the duration risk is measured by the average duration of the portfolio. Duration, expressed in years, is used as a measure of the sensitivity of the fixed income instrument to a change in interest rates. Usually, individual duration of fixed income instruments in the portfolio is calculated and the portfolio duration is weighted average of such individual instrument duration. A longer portfolio duration is associated with greater price fluctuations. A rise in interest rates could normally lead to decrease in prices and
--	---

	generally negatively affects portfolios having longer duration vis-a-vis portfolios having shorter duration. A fall in interest rate generally benefits portfolio having longer duration. A longer duration portfolio is also generally associated with greater volatility vis-a-vis a shorter duration portfolio. • Sovereign Risk: Sovereign risk is the likelihood that a Government will default on its loan obligation by failing to meet its principal payments or interest. It comes in different forms and may result in losses to investors in addition to negative political consequences. The Central Government of a country is the issuer of the local currency in that country. The Government (Central / State) raises money to meet its capital and revenue expenditure by issuing debt or discounted securities. Since payment of interest and principal amount has a sovereign status implying no default, such securities are known as securities with sovereign credit. For domestic borrowers and lenders, the credit risk on such sovereign credit is minimal, even lower than a security with “AAA” rating and hence commands a yield, which is lower than a yield on “AAA” security. For details on risk factors and risk mitigation measures, please refer SID.

Applicable NAV (after the scheme opens for subscriptions and redemptions)	Cut off timing for subscriptions/ redemptions/ switches: In case of Subscription/Switch-in for any amount: • In respect of valid applications received upto 3.00 p.m. on a Business Day at the official point of acceptance of transactions and where the funds for the entire amount of subscription/purchase as per the application/Switch-in request, are available for utilization before the cut-off time i.e. 3.00 p.m. - the closing NAV of the day shall be applicable. • In respect of valid applications received after 3.00 p.m. on a Business Day at the official point of acceptance of transactions and where the funds for the entire amount of subscription/purchase as per the application/Switch-in request, are available for utilization either on the same day or before the cut-off time of the next business day - the closing NAV of the next Business Day shall be applicable. • Irrespective of the time of receipt of application at the official point of acceptance of transactions, where the funds for the entire amount are available for utilization before the cut-off time on any subsequent Business Day - the closing NAV of such subsequent Business Day shall be applicable. In case of investments through Systematic Investment Plan (SIP), Systematic Transfer Plans (STP), Other STP methods as may be offered by the AMC, IDCW Transfer, Trigger etc. the units would be allotted as per the closing NAV of the day on which the funds are available for utilization irrespective of the instalment date of the SIP, STP or record date of IDCW etc. Since different payment modes have different settlement cycles including electronic transactions (as per arrangements with Payment Aggregators/Banks/Exchanges etc), it may happen that the investor's account is debited, but the money is not credited within cut-off time on the same date to the Scheme's bank account, leading to a gap/delay in Unit allotment. Investors are therefore urged to use the most efficient electronic payment modes to avoid delays in realization of funds and consequently in Unit allotment. Redemptions including switch-outs: In respect of valid applications received upto 3.00 pm on a business day by the Mutual Fund, same day's closing NAV shall be applicable. In respect of valid applications received after the cut off time by the Mutual Fund, the closing NAV of the next business day shall be applicable.

Dividend Policy		The Scheme may declare IDCW subject to the availability of distributable surplus and approval from Trustees. IDCW would become payable to the unitholders whose names appear on the register of unitholders on the record date as fixed for the scheme. The IDCW declared will be paid net of tax deducted at source, wherever applicable. There is no assurance or guarantee to the Unit holders as to the rate of IDCW distribution nor that the IDCW will be paid regularly. If the Fund declares IDCW, the NAV of the Scheme would stand reduced by the amount of IDCW paid. All the IDCW payments shall be in accordance and compliance with SEBI, Stock Exchange Guidelines, as applicable from time to time. IDCW is the amount that can be distributed out of equalisation reserve which is part of the sale price that represents realised gains. Any IDCW upto Rs. 100/- shall be compulsorily reinvested in the same option under the scheme at prevailing NAV on record date.

Load Structure

Exit Load is an amount which is paid by the investor to redeem the units from the scheme. Load amounts are variable and are subject to change from time to time. For the current applicable structure, please refer to the website link: <https://www.bajajamc.com/sid-disclosure> or may call at toll free no. 18003093900 or your distributor.

Type of Load	Load chargeable (as %age of NAV)
Entry	Not applicable
Exit*	For each purchase of units through Lumpsum / switch-in / Systematic Investment Plan (SIP) and Systematic Transfer Plan (STP), exit load will be as follows: ➤ if units are redeemed / switched out within 1 year from the date of allotment: • if up to 30% of units allotted are redeemed/switched out – Nil • any redemption / switch-out of units in excess of 30% of units allotted – 1% of applicable NAV. ➤ If units purchased or switched in from another scheme of the Fund are redeemed or switched out after 1 year from the date of allotment, no exit load is payable.

* The load on other types of transaction could be Income Distribution cum Capital Withdrawal reinvestment, Switch in/out, SIP/SWP/STP (as applicable)

In accordance with the requirements specified by the SEBI Master Circular for Mutual Funds dated June 27, 2024, no entry load will be charged for subscription /additional subscription /switches accepted by the Mutual Fund. Similarly, no entry load will be charged with respect to applications for registrations under the SIP/STP accepted by the Mutual Fund. For the purpose of charging of exit load, units would be considered on First in First out (FIFO) basis. Any imposition or enhancement of exit load shall be applicable only on prospective investments.

In case of redemption/switch undertaken in excess of 25% holding of an investor on account of compliance with the requirements of SEBI Master Circular for Mutual Funds dated June 27, 2024 shall not be subject to exit load imposed in the scheme.

The upfront commission on investment made by the investor, if any, shall be paid to the ARN Holder (AMFI registered distributor) directly by the investor, based on the investor's assessment of various factors including service rendered by the ARN Holder.

Exit load (if any) charged to the unitholders by the Mutual Fund on redemption (including switch-out) of units shall be credited to the respective scheme net of Goods & Services Tax.

	Goods & Services Tax on exit load, if any, shall be paid out of the exit load proceeds. No exit load would be charged for switch transaction from this scheme to any another equity scheme of Bajaj Finserv Mutual Fund. Further, switches of following kind within the scheme would not attract any exit load: (i) switch from Direct Plan to Regular Plan; (ii) switch from Regular Plan to Direct Plan; (iii) within different Options (Income Distribution cum capital withdrawal /growth) of the same Plan (Direct/Regular) of the scheme. Load on bonus/ re-investment of Income Distribution cum capital withdrawal units: In terms of SEBI Master Circular for Mutual Funds dated June 27, 2024, no entry and exit load shall be charged on bonus units or units allotted on reinvestment of Income Distribution cum capital withdrawal. The Trustee / AMC reserves the right to change the load structure any time in future if they so deem fit on a prospective basis. The investor is requested to check the prevailing load structure of the scheme before investing. In case of changes to load structure, the AMC would endeavour to do the following: 1. An addendum would be attached to the SID and Key Information Memorandum (KIM). The same may be circulated to brokers/distributors so that the same can be attached to all SID and abridged SID in stock. Further the addendum would be sent along with a newsletter to unitholders immediately after the changes. 2. Arrangement would be made to display the changes in the SID in the form of a notice in all the official points of acceptance of transactions and distributor's/broker's office. 3. The introduction of the exit load along with the details may be stamped in the acknowledgement slip issued to the investors on submission of the application form and may also be disclosed in the statement of accounts issued after the introduction of such load. 4. A public notice shall be provided on the website in case of changes undertaken to the exit load. The AMC/Trustee reserves the right to change / modify the Load structure of the Scheme, subject to maximum limits as prescribed under the Regulations. However, the Redemption /Repurchase Price will not be lower than 95% of the NAV.

* 366, wherever applicable.

For the above purposes, 'B30 cities' shall be beyond Top 30 cities as at the end of previous financial year as communicated by AMFI. Retail investors would mean individual investors from whom inflows into the scheme would amount upto Rs. 2,00,000/- per transaction.

Direct Plan shall have a lower expense ratio excluding distribution expenses, commission, etc and no commission for distribution of units will be paid / charged under Direct Plan. All fees and expenses charged in a Direct Plan (in percentage terms) under various heads including the investment and advisory fee shall not exceed the fees and expenses charged under such heads in other than Direct Plan.

The AMC shall adhere provisions of SEBI Master Circular for Mutual Funds dated June 27, 2024 and various guidelines specified by SEBI as amended from time to time, with reference to charging of fees and expenses. Accordingly:

- a. All scheme related expenses including commission paid to distributors, shall be paid from the scheme only within the regulatory limits and not from the books of the AMC, its associates, sponsor, trustee or any other entity through any route. Provided that, such expenses that are not specifically covered in terms of Regulation 52 (4) can be paid out of AMC books at actual or not exceeding 2 bps of the Scheme AUM, whichever is lower.
- b. The Mutual Fund shall adopt full trail model of commission in the scheme, without payment of any upfront commission or upfronting of any trail commission, directly or indirectly, in cash or kind, through sponsorships, or any other route.
- c. All fees and expenses charged in a Direct Plan (in percentage terms) under various heads including the investment and advisory fee shall not exceed the fees and expenses charged under such heads in Regular Plan.
- d. No pass back, either directly or indirectly, shall be given by the Fund / the AMC / Distributors to the investors.

Disclosure on Goods & Services Tax:

Goods & Services Tax on investment management and advisory fees shall be in addition to the above expense.

Further, with respect to Goods & Services Tax on other than management and advisory fees:

- Goods & Services Tax on other than investment and advisory fees, if any, shall be borne by the scheme within the maximum limit of TER as per regulation 52 of the Regulations.

	• Goods & Services Tax on exit load, if any, shall be paid out of the exit load proceeds and exit load net of Goods & Services Tax, if any, shall be credited to the scheme. • Goods & Services Tax on brokerage and transaction cost paid for asset purchases, if any, shall be within the limit prescribed under regulation 52 of the Regulations. For the actual current expenses being charged to the scheme, investors should refer to the website of the mutual fund at link: https://bajajamc.com/downloads?ter=. Any change proposed to the current expense ratio will be updated on the website at least three working days prior to the change. As per the Regulations, the total recurring expenses that can be charged to the scheme shall be subject to the applicable guidelines. The total recurring expenses of the scheme will however be limited to the ceilings as prescribed under Regulation 52(6) of the Regulations. Total Expense Ratio (TER) accrual rate as on September 30, 2025 (inclusive of GST and Additional TER, if any): Regular Plan: 2.02% Direct Plan: 0.49%
