- Champions of Corporate India, embodying resilience and innovation, are rapidly expanding to capitalize on India's dynamic economy, leveraging a robust consumer base and rising middle class.
- Indian large caps still have substantial room to grow compared to the largest US companies.

A large 3D bar chart with three bars of increasing height, colored in shades of blue and white, is superimposed over a photograph of a modern glass skyscraper. The chart is positioned on the left side of the image, and the skyscraper is in the background. The right side of the image has a solid blue background with white text.

India poised to grow with Champions of Corporate India at the forefront

GDP Growth Rate (%)

Source: IMF; Latest available data as on October 2024.

- India has historically exceeded global performance estimates on growth.
- Large caps are likely to be major beneficiary from India's GDP (Gross Domestic Product) growth through increased consumer demand and expanded investment opportunities.

Why Large Caps Now?

Nifty 50 TRI Milestones: Time taken to cross 5,000 points

- The intervals of achieving incremental 5K points on Nifty 50 TRI is on a declining trend.

- Thus, highlighting the potential for faster wealth creation from large caps.

- Recently Nifty 50 TRI has reached 35000 in record 204 days.

Source: NSE Indices, As on 31st Dec 24| Past performance may or may not be sustained in future

Nifty 100 TRI Historical Performance

Nifty 100 TRI

Index Name	1 Year	3 Years	5 Years	Since Inception
Nifty 100 TRI	12.9%	13.21%	15.92%	18.17%

* Less than 1-year Absolute returns, Greater than 1 year Compound Annualized returns

Source: ICRA MFI, Data As on 31st Dec 24 | Past performance may or may not be sustained in future

Relatively Steady Returns & Wealth Creation over Long Term

No negative returns over the 5 years holding period.

High potential for long term wealth creation.

Source: NSE & Internal Analysis, As on 31st Dec 24 Index Nifty 100 TRI | Past performance may or may not be sustained in future
“RR” Denotes Rolling Return presented on Y axis and number of years on X axis.

Large-caps tend to be relatively stable during market fluctuations.

Large Cap Index performed relatively well during Falling Market, Flat Market and Narrow Market than Mid and Small Caps

Past performance may or may not be sustained in future | Source: ICRA MFI
Point to Point Absolute returns has been considered for the above calculation

Liquidity Risk in Large Cap are very Low

Liquidity in Large-Cap Stocks:

High trading volumes offer frequent trading opportunities

Narrow bid-ask spreads show efficient market transactions.

Liquidity in Days indicates days needed to cash out a portfolio.

Low impact costs allow large trades with minimal price impact.

Source ICRA MF | Average of all Large Cap, Mid Cap and Small cap fund's portfolio liquidity measured which are present In the industry. Past performance may or may not be sustained in future

Drawdown Analysis

- Large caps tends to fall lesser than their peers in mid and small cap space.

- They regain their losses much faster than their peers

Source: ICRA MFI & Internal Analysis, As on 31st December 24 | Past performance may or may not be sustained in future | Y axis shows the Returns

CY Risk Adjusted Return Nifty 100 TRI

Stability

Large-cap stocks offer stability and lower volatility, boosting risk-adjusted returns.

Liquidity

High trading volumes and liquidity reduce costs and enhance portfolio management.

Resilience

Large-cap stocks perform relatively consistently across market cycles.

Source: ICRA MFI & Internal Analysis, As on 31st Dec 24 | Past performance may or may not be sustained in future | Y axis shows the Risk adjusted Returns in %.

Large Caps are Relatively Consistent Performers

- 18 out of 21 years, Large Caps have closed in the positive territory.

- The Risk (Standard Deviation) of Large Caps have been in below 20 zone for 14 out of last 21 years.

Source: NSE & Internal Analysis, Nifty 100 TRI Data As on 31st Dec 24 | Past performance may or may not be sustained in future

Large Caps more Attractive Vis a Vis Small & Mid Cap

Midcaps vs large caps

- The relative strength of midcap vis-à-vis large caps is at 2.3X and small caps vis-à-vis large caps at 0.7X.
- The trend has been in an upward move, indicating that the midcap and small cap indices has been outperforming the large cap index.
- The current relative strength, when compared to the long-term median indicates that any mean reversion would be largely positive for large cap stocks.

Source: Bloomberg & Internal Analysis, Nifty 50, Nifty Midcap 100 & Nifty Smallcap 100 Indices value data As on 31st December 24 | Y axis represents the valuation. Past performance may or may not be sustained in future

Small caps vs large caps

Large Cap currently available at Fair valuation

- The current valuation of the large caps is closer to the long-term average of 23.1.
- The valuations have been range bound around the long-term average.
- This indicates that the large caps are fairly valued for long term investments.

Source: NSE & Internal Analysis, Nifty 100 TRI Data as on 31st December 24 | Past performance does not guarantee future results PE-Price to Earning Ratio | TTM-Trailing Twelve Month | Y axis represents the valuation

Earnings Growth of Large Caps

Nifty 50-Annual EPS (Earnings Per share)

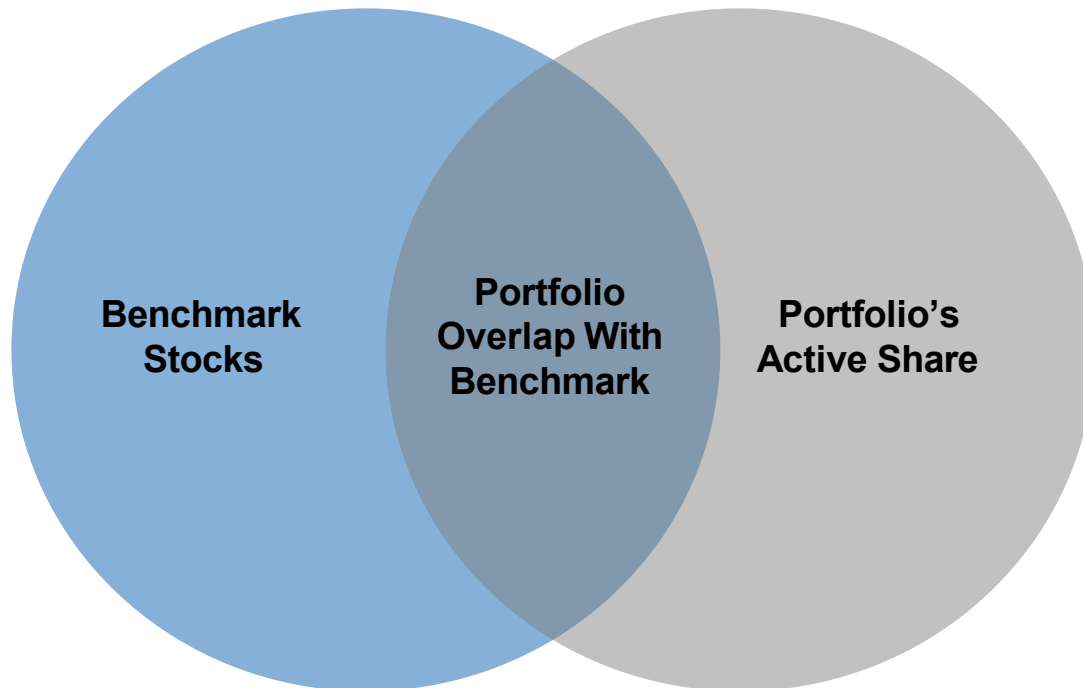

Source: Bloomberg, & Internal Analysis As on 31st March 24 | Past performance may or may not be sustained in future
"E" Denotes Estimated

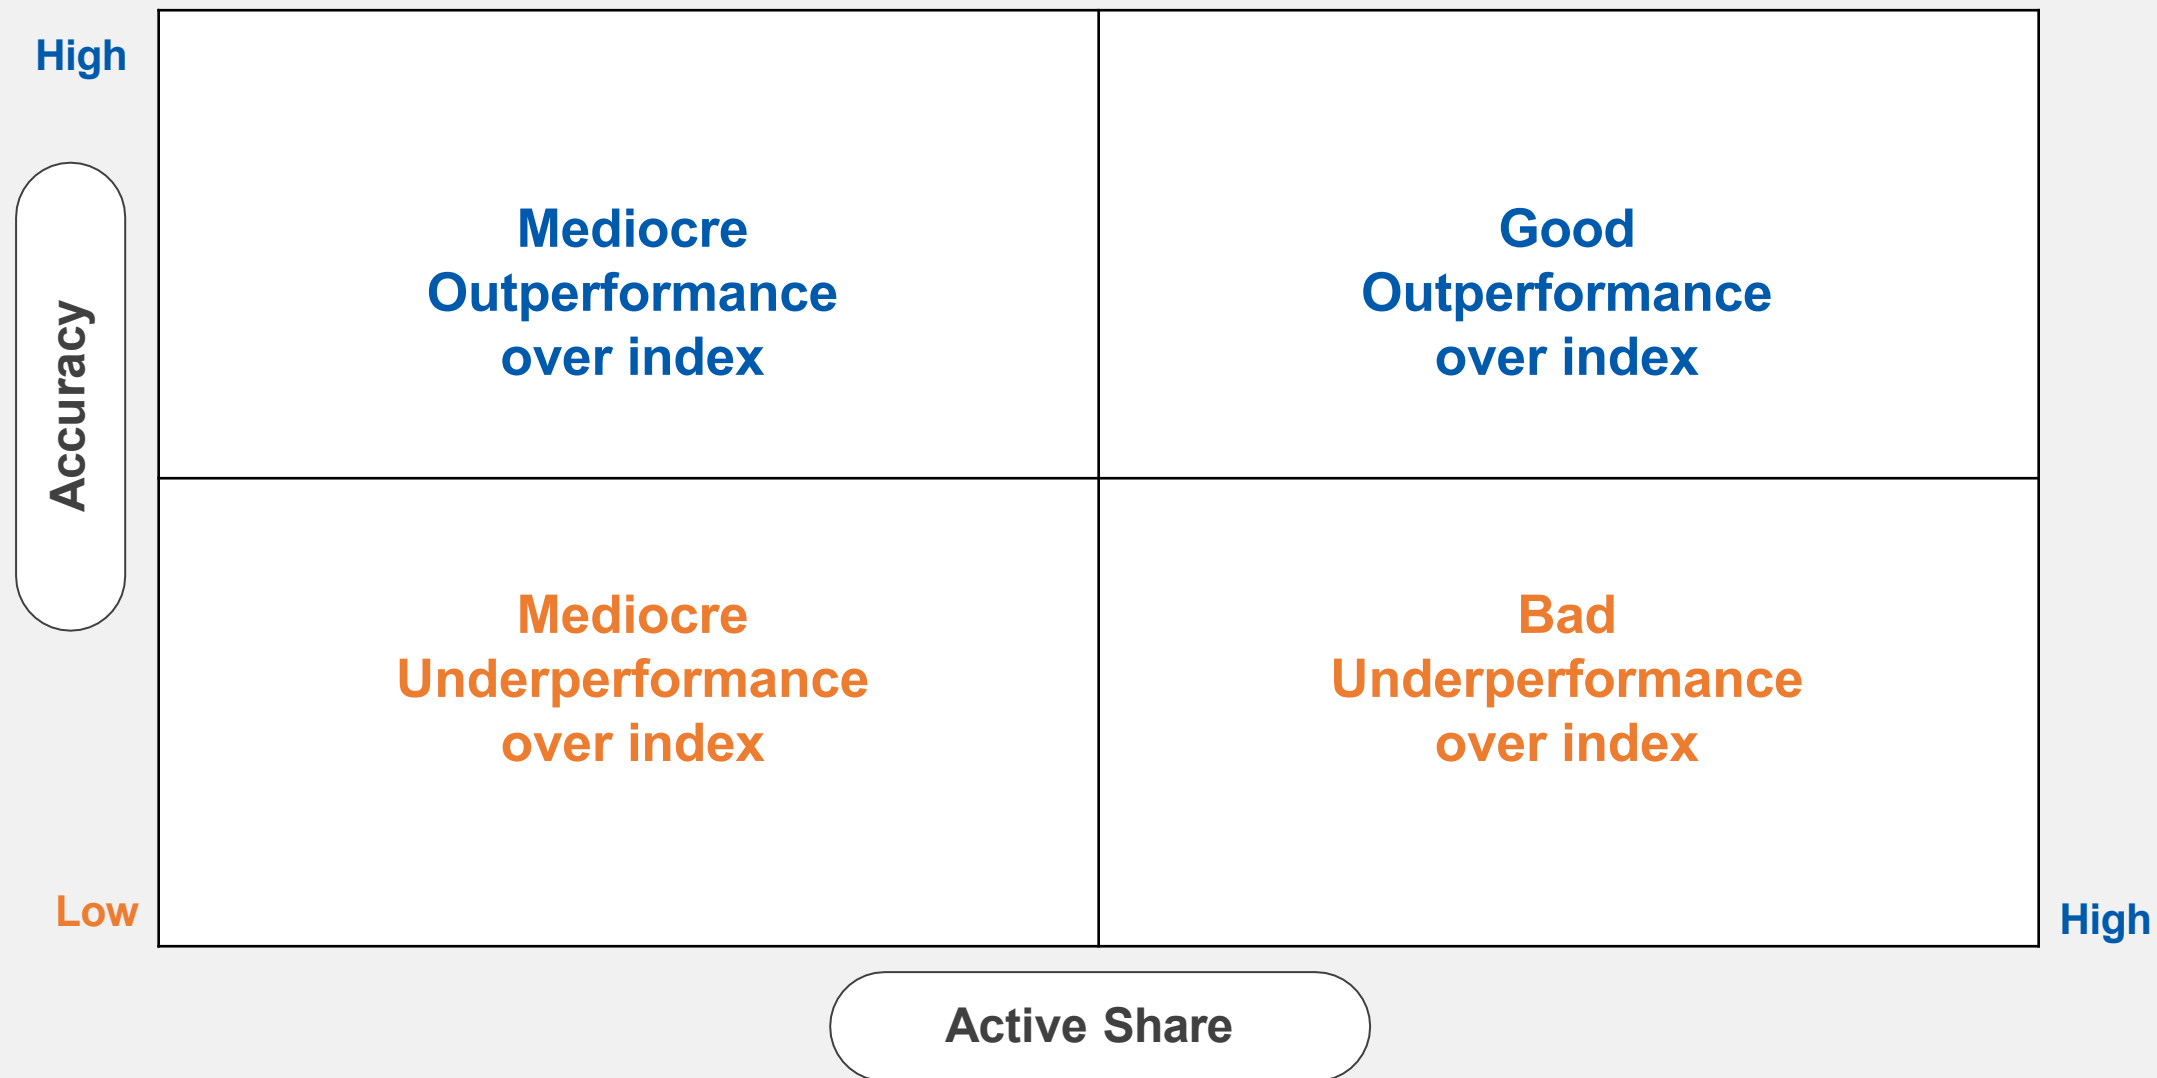

- Large Caps' earnings have crossed the inflection point in 2021 and currently appears to be in a robust growth phase.
- The EPS is expected to grow at 15% and 14% for FY25 and FY26 respectively.

Why to Invest in Bajaj Finserv Large Cap Fund?

If You Buy The Index, You Cannot Beat The Index

- Bajaj Finserv Large Cap Fund will aim to have a high Active Share which would indicate that the fund will take high conviction bets in select stocks for growth.
- Active Share measures the percentage of stock holdings, that deviates from the benchmark index.
- We believe and practice that “if you buy the index, you cannot beat the index.”
- Traditional indices reflect the past, but our investment strategy looks ahead, positioning your portfolio for future opportunities and growth.

High Active Share Explained

Stock Name	Allocation		Overlap
	Portfolio A	Index	
Stock A	19	20	19
Stock B	16	18	16
Stock C	12	15	12
Stock D	15	12	12
Stock E	12	10	10
Stock F	9	8	8
Stock G	5	6	5
Stock H	4	5	4
Stock I	5	4	4
Stock J	3	2	2
Total Portfolio Overlap			92
Active Share (100 - Overlap)			8

Stock Name	Allocation		Overlap
	Portfolio B	Index	
Stock A	9	20	9
Stock B	12	18	12
Stock C	8	15	8
Stock D	7	12	7
Stock E	5	10	5
Stock F	11	8	8
Stock G	15	6	6
Stock H	10	5	5
Stock I	10	4	4
Stock J	13	2	2
Total Portfolio Overlap			66
Active Share (100 - Overlap)			34

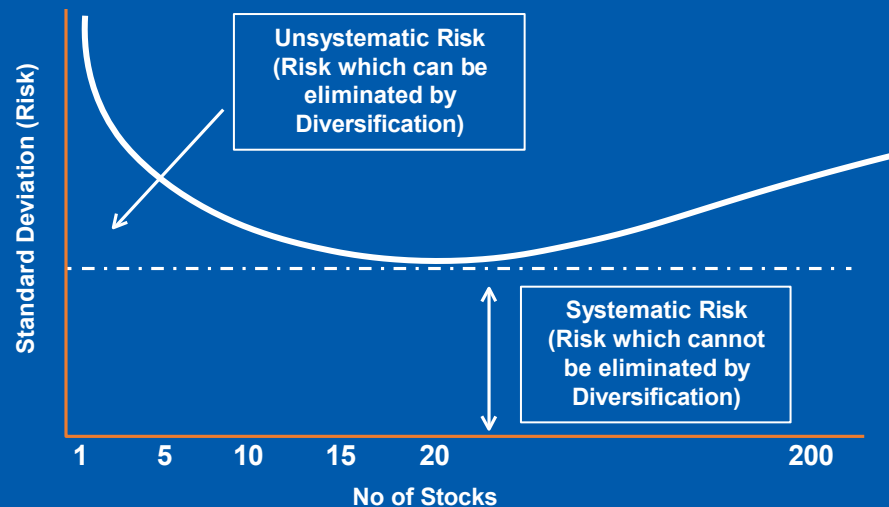

The above table is an illustration.

Portfolio A is more index hugging whereas Portfolio B is more actively managed.

- Portfolio Managers often face the stock selection challenge owing to limited stocks in large cap universe (only Top 100).
- Hence, allocating to high-conviction stocks is key to success in managing a Large Cap Fund.
- High Active Share is outcome of high conviction concentrated bets in select stocks

Concentrated Portfolio of 25 to 30 stocks for optimum risk return reward*

Stock Specific Risk

Research indicates that holding 20-30 stocks provides statistically significant **diversification** benefits, reducing portfolio-specific risk.

Introduced by Nobel laureate Harry Markowitz in 1952, **MPT (Modern Portfolio Theory)** optimizes expected returns for a given risk level by **diversifying** across different asset types.

Our strategy is to build a portfolio of approximately **25 to 30 Stocks**, aiming for optimal **risk diversification** consistent with **MPT** principles.

*The above investment strategy is based on prevailing market conditions and opportunities available at the time of investment. The Fund Manager reserves the right to change the count of stocks invested based on the SID and the opportunities available at the time of investment done, Position in derivatives will not be considered for the computation of total number of stocks in the portfolio

#The Capital Allocation Line (CAL) is a line that graphically depicts the risk-and-reward profile of assets and can be used to find the optimal portfolio.

**Highly
Concentrated
portfolio** with high
conviction in stock
selection

**High Active
Share** with aim
to outperform
the benchmark
index over long-
term

Bajaj Finserv Large Cap Fund reflects a balanced yet growth-oriented approach with a strong emphasis on market leaders across diversified sectors. The core thesis focuses on long-term sustainability and market dominance.

Blue-chip stock allocation
Preference for established market players with potential for returns in long term, even in volatile conditions.

Pharmaceuticals & insurance exposure
Highlights belief in healthcare and financial protection as critical for navigating uncertainties and sectoral resilience.

Consumer staples & telecom presence
Indicates belief in steady cash flow generation due to recurring demand, regardless of market disruptions.

Digital economy exposure
Reflects optimism in India's tech-driven transformation and future growth potential.

The fund's portfolio is strategically constructed on the back of high conviction investment ideas. Furthermore, the overall philosophy revolves around balancing defensive plays with selective growth opportunities, underpinned by quality, market leadership, and sectoral resilience. The sequence, relationship and nature of trends in these assets helps understand and anticipate market movements driven by psychological factors, leading to more informed and effective investment decisions. By integrating behavioural insights with fundamental analysis, our model offers a comprehensive approach to asset allocation, optimizing returns while managing risks.

Active Share measures the percentage of stock holdings, based on weights (% to NAV) in a investment manager's portfolio that differs from the benchmark index.

- A low Active Share score is said to indicate that a portfolio manager is closely replicating the benchmark index and engaging in a passive investment strategy.
- A high Active Share score is said to indicate that a fund's holdings differ from the benchmark index and that the portfolio manager is actively managing it.

Active Share : 50%
