## WHAT ARE OVERNIGHT FUNDS

An overnight fund is a type of mutual fund that invests in overnight money market instruments allowing investors to park their surplus funds for a short period.

The securities in the portfolio mature every day and the fund manager uses the proceeds to buy new securities for the portfolio maturing the very next day.

Since the securities in these funds mature the next day, these funds are not exposed to the kind of Interest rate risk or Credit risk like the rest of the debt funds.
